

**GERARDO BRANCUCCI**

SHORT PROFESSIONAL INFO

Associate Professor  
Department of Sciences for Architecture – Polytechnic School  
University of Genoa

Academic and Scientific Activities

**QUALIFICATIONS**

- Graduated in Geological Science at the Science Department of the University of Genoa on 2 May 1977 (score: 110/110)
- Certified free lancer
- National Research Council scholarship for a project on soil conservation in landslide phenomena (April 1978)
- Assistant Professor at the Department of Earth Sciences, University of Genoa (since August 1980)
- Member of the "Italian Glaciological Committee" (since 1990)
- Associated Professor in Physical Geography and Geomorphology (since November 1992)
- General secretary of the "Italian Glaciological Committee" (1991-93 and 1993-96)
- Editorial member of the journal "Physical Geography and Quaternary Dynamics" (1991-93 and 1993-96)
- Member of the Scientific Council of the International Association of Climatology (1994-1997; 2000-2006)
- Member of the National Council of the Italian Society of Environmental Geology (1998-2007)
- Member of the Scientific Council of the International Centre of Coastal and Ocean Policy Studies (ICCOPS) (2000-2003)
- General secretary of the International Centre of Coastal and Ocean Policy Studies (ICCOPS) (2000-2006)
- President of the International Centre of Coastal and Ocean Policy Studies (ICCOPS) (2000-20011)
- Board certified expert on materials of natural beauty (since August 1999)
- Member of the PhD council for the Research in Earth Sciences.
- Responsible for the MURST and Athenaeum financing funds
- Member of the executive committee of ProGEO Europa (2000-2003)
- Elected member for the coordination of the Athenaeum library system (until 2004)
- Elected member for the coordination of the faculty library system (until March 2006)
- Member of the scientific council for the Interreg IIIB project "Alpine Space" ALPTER
- Head of the Department of Architectural History, Urban and Regional Planning, Landscape Architecture (POLIS) (2005-2011)

**TEACHING ACTIVITIES**

- Applied Geomorphology
- Applied Geology on Territorial Planning
- Physical Geography and Geomorphology
- Analysis and Management of Territorial Information

**Specialization School in Restoration of Monuments:**

- Geo-Climatic Analysis of the Deterioration of Artefacts

**RESEARCH ACTIVITIES**

Developed research activities related to the study of the morpho-climatic evolution of the territory with particular focus on the problems of the climatic variability and its influence on the morphogenesis and morphodynamics of the territory.

Research into geosites and elements of geologic value in a project financed by the region of Liguria (principal investigator)

Responsible for the “Center for the Documentation of Geosites” of the Department of Architecture.

Participation in projects of national interest, both as the local scientific responsible and as researcher.

**CONSULTATION ACTIVITIES**

Scientific responsible for the following conventions and/or research contracts (in the context of collaborations between the Department with various institutions)
